

## Rule of Thirds Examples

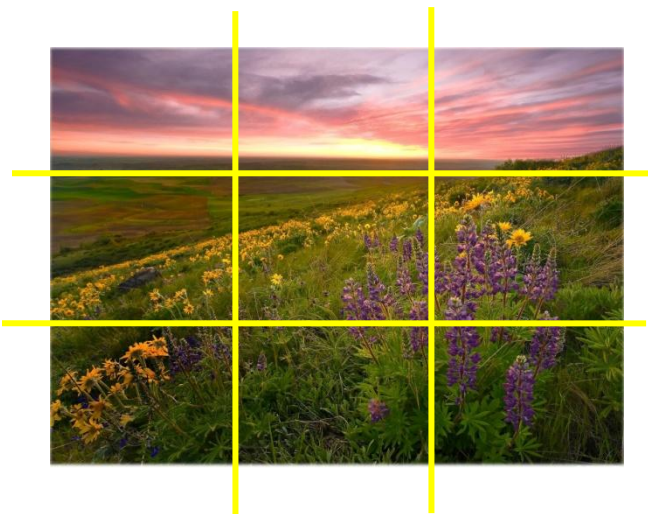

This photo of a toy plane has good composition because it follows the rule of thirds. The plane is at the bottom right intersection of the thirds lines. It is aimed on a slight diagonal upward, and it has look and lead room.

The center of the flower is close to the lower right hot spot intersection of the thirds lines.

<http://fineartamerica.com/contests/rule-of-thirds-photography-only.html>

This photo has good composition because the change from the land to the sky is at the top third horizontal line. The rule of thirds also applies here because the main cluster of purple flowers surrounds the bottom right hot spot (intersection of the vertical 2/3 line and the horizontal 2/3 line).
